Ahmedabad, Gujarat | Phone: 7984118301 | rishitpradeep90@gmail.com |
<https://www.linkedin.com/in/rishit-pradeep-b313a1209/>

EDUCATION:

Vellore Institute Of Technology | B. Tech. in Computer Science (CSE) School of Computing Science and Engineering

CGPA : 8.26

SKILLS & CERTIFICATION:

Languages: Python, R Programming, C++, SQL, MATLAB, HTML, ReactJS, Tailwind CSS,

Softwares: OpenCV, Tableau, Power Bi, MATLAB, Cisco Packet Tracer

Certification: Google Developer Externship: Completed for AI and ML foundation and project completion, Microsoft Power Platform App Maker, Coursera Foundation of Data Analysis, Coursera Bits and Bytes of Computer Networking

WORK EXPERIENCE:

Internship at Bowled.io

(Jan2023-Feb2023)

- Conducted comprehensive testing of game features to ensure functionality and quality.
- Identified and documented bugs, collaborating with developers for prompt resolution.
- Participated in playtesting sessions, providing valuable feedback on gameplay mechanics and user experience.

Internship at Mahi Granites(Hyderabad,India)

(Feb2025 -)

- Analyzed large datasets related to sales, inventory, and operations to extract insights, improving business decision-making.
- Developed dashboards and reports using [mention tools like Python, SQL, Power BI, Tableau, etc.], visualizing key trends and performance metrics.
- Cleaned, processed, and structured raw data, improving data accuracy and efficiency for reporting.

PROJECTS

Facial Recognition System

(Fall 2022) :

Implemented using Python AI to automate attendance tracking and enhance security measures.

Job Portal

(Fall 2023):

Developed using Apache, HTML, React, CSS, and MongoDB to connect job seekers with employers and streamline the hiring process.

Energy Consumption Analysis

(Dec 2023)

Utilized CNN and a web application to analyze energy usage patterns, providing insights for more efficient consumption.

Insuracare – Insurance Predictor

(Fall 2024)

Built using React (frontend) and Machine Learning algorithms to accurately predict insurance claims.

Python Sentiment Analysis

(Jan 2025)

Developed a sentiment analysis tool using Python to classify emotions in text data, providing insights into public sentiment on various topics.

Awards & Achievements

Runner-Up – Valorant Tournament

(October 2022 & July 2023)

Vellore Institute of Technology (VIT), Bhopal

Led my team to 2nd place twice in an official Valorant tournament, competing against top college teams.
